Patent No. US20020150891A1
GENERAL INFORMATION
APPLICANT: Hood, Lerry E.
APPLICANT: Rowen, Lee
APPLICANT: KOOP, Ben P.
TITLE OF INVENTION: DIAGNOSTIC AND THERAPEUTIC COMPOSITIONS AND METHODS WHICH UTI
NUMBER OF SEQUENCES: 1279
CORRESPONDENCE ADDRESS:
Seed and Berry LLP
STREET: 6300 Columbia Center, 701 Fifth Avenue

Publication No. US20040072769A1

GENERAL INFORMATION:

APPLICANT: Yin, James Q.

TITLE OF INVENTION: Methods for design and selection of short double-stranded

TITLE OF INVENTION: oligonucleotides, and compounds of gene drugs

TITLE OF INVENTION: oligonucleotides, and compounds of gene drugs

TITLE OF INVENTION: 01900ucleotides, and compounds of gene drugs

TITLE OF INVENTION: 01900ucleotides, and compounds of gene drugs

CURRENT APPLICATION NUMBER: US/10/016,490C

CURRENT FILING DATE: 2002-11-22

Sequence 34, Application US/09454394

Sequence 34, Application US/09454394

Patent No. US20020034525A1

GENERAL INFORMATION:
APPLICANT: Tina McIntosh
APPLICANT: Steven Head
APPLICANT: Philip Goelet
TITLE OF INVENTION: Mcthods for the Detection of Multiple
TITLE OF INVENTION: Mchods for the Detection of Multiple
TITLE OF INVENTION: Mchods for the Detection of Multiple
TITLE REFERENCE: 04990.0029
CURRENT APPLICATION NUMBER: US/09/454,394
CURRENT FILING DATE: 1999-12-03
EARLIER FILING DATE: 1999-12-03
EARLIER FILING DATE: 1993-11-03
NUMBER OF SEQ ID NOS: 72

SOFTWARE: FateSEQ for Windows Version 3.0

SEQ ID NO 34
LENDITH: 20
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          APPLICANT: Tina McIntosh
